

The Flight Sharing Platform

## Full-Stack Web-Developer

**Sector:** Web Service, Sharing Economy and Light Aviation

**Position type:** Full-Time / CDI position

**Required profile:** Full-Stack (PHP, MySQL, AngularJS)

**Starting:** ASAP

**Remuneration:** According to profile / Industry Average

**Location:** Paris 6th Arrondissement (Agoranov Incubator)

### What is Wingly?

**Wingly** is Europe's leading flight sharing platform. We connect private pilots with passengers so they can share the cost and the passion of the flight. Founded in July 2015, we have already connected thousands of people, making flying accessible again.

### Who are we looking for?

- Full-Stack Web-Development skills with strong focus on PHP, MySQL, AngularJS
- Cordova, PhoneGap & Ionic Framework Experience
- HTML5/CSS3/SASS and JavaScript (Raw and jQuery) experience
- More than 3 years experience of web development experience
- Fluent in English. German and French are a plus
- Strong understanding of UX / UI is a plus

### Your Job:

- In charge of web development
- You will work directly with the CTO, Lars
- Development of the website through creativity and skills

### Why join wingly?

Wingly is an international team of people who are passionate about aviation, and who are promoters of the collaborative economy. Joining us means living the start-up experience at its best. We work hard, but also enjoy our team activities such as flights aboard light aircraft and helicopters. Our headquarters are located at an incubator in the heart of Paris, next to the Jardin du Luxembourg, within an open-space of focus and creativity, surrounded by a plethora of other startups.
